6-3 Scale Drawings and Models. ©Glencoe/McGraw-Hill46Glencoe Pre-Algebra. When objects are too small or too large to be drawn or constructed at actual size, people use a scale drawing or a model. The scale is the relationship between the measurements of the drawing or model to the measurements of the object. The scale can be written as a scale factor, which is the ratio of the length or size of the drawing or model to the length of the corresponding side or part on the actual object.

Scale drawings allow us to accurately represent sites, spaces, buildings and details to a smaller or more practical size than the original. When a drawing is described as "to scale", it means that each element in that drawing is in the same proportion, related to the real or proposed thing - it is smaller or indeed larger by a particular percentage.

Cole is an urban planner. He wants to create a small scale drawing of a city block. The block is a square with an area of 8,100 square meters. Create a scale drawing of the block using a scale factor of 0.1. So the first thing we could think about, they give us the area of the block. And it's a square block. So it has the same length and width.

Make math matter to students in grades 7–8 using Math Games! In this 128-page book, students apply various math skills and strategies to correctly solve three problems in a row to win each game. The book covers concepts such as place value, math operations, estimation, fractions, decimals, percents, proportions, properties, patterns, algebra, measurement, geometry, scale, data analysis, and problem solving. It supports NCTM standards and aligns with state, national, and Canadian provincial standards.

Interactive Notebooks: Math for grade 7 is a fun way to teach and reinforce effective note taking for students. Students become a part of the learning process with activities about integers, proportions, expressions and inequalities, angle relationships, probability, and more! This book is an essential resource that will guide you through setting up, creating, and maintaining interactive notebooks for skill retention in the classroom. High-interest and hands-on, interactive notebooks effectively engage students in learning new concepts. Students are encouraged to personalize interactive notebooks to fit their specific learning needs by creating fun, colorful pages for each topic. With this note-taking process, students will learn organization, color coding, summarizing, and other important skills while creating personalized portfolios of their individual learning that they can reference throughout the year. Spanning grades kindergarten to grade 8, the Interactive Notebooks series focuses on grade-specific math, language arts, or science skills. Aligned to meet current state standards, every 96-page book in this series offers lesson plans to keep the process focused. Reproducibles are included to create notebook pages on a variety of topics, making this series a fun, one-of-a-kind learning experience.
