A Feminist Political Economic Framework. FPE deconstructs and reframes basic neo-liberal assumptions and in the process refocuses economic theory and constructs alternatives. It uses a political economic approach, which is “the study of society as an integrated whole.”. This approach identifies and analyzes “social relations as they relate to the economic system of production” (Drache 1978 as quoted in Bezanson and Luxton 2006, 12).

Feminist political ecology is a subfield that brings feminist theory, objectives, and practices to political ecology, which is an analytical framework based on the assumption that ecological issues must be understood and analyzed in relation to political economy (and vice versa). Feminist political ecologists hold that gender is a crucial variable – in relation to class, race, and other relevant dimensions of political ecological life – in constituting access to, control over, and ...

Feminist economics analyses the interrelationship between gender and the economy. Thereby, feminist economics also takes the unpaid, non-market intermediated part of the economy and society into account and examines the driving forces behind common dichotomies such as economic–social, productive–reproductive, masculine–feminine, paid–unpaid or public–private.

The conceptual framework of feminism, as a reactionary ideology, basically consists of 'power,' 'woman,' 'rights,' and 'equality'. The same can be said of African feminism, which has on its priority list such goals as self-determination, which have economic overtones sewn on a materialistic metaphysic.

We argue that the Women, Peace and Security agenda reproduces a neoliberal understanding of economic empowerment that inadequately captures the reality of women’s lives in post-war settings for two reasons: first, it views formal and informal economic activities as dichotomous and separate, rather than as intertwined and constitutive of each other; and, second, it conceptualizes agency as individual, disembodied, abstract, universalizing and conforming to the requirements of the ...

This book envisages a different form of our economies where care work and care-full relationships are central to social and cultural life. It sets out a feminist vision of a caring economy and asks what needs to change economically and ecologically in our conceptual approaches and our daily lives as we learn to care for each other and non-human others. Bringing together authors from 11 countries (also representing institutions from 8 countries), this edited collection sets out the challenges for gender aware economies based on an ethics of care for people and the environment in an original and engaging way. The book aims to break down the assumed inseparability of economic growth and social prosperity, and natural resource exploitation, while not romanticising social-material relations to nature. The authors explore diverse understandings of care through a range of analytical approaches, contexts and case studies and pays particular attention to the complicated nexus between re/productivity, nature, womanhood and care. It includes strong contributions on community economies, everyday practices of care, the politics of place and care of non-human others, as well as an engagement on concepts such as wealth, sustainability, food sovereignty, body politics, naturecultures and technoscience. *Feminist Political Ecology and the Economics of Care* is aimed at all those interested in what feminist theory and practice brings to today's major political economic and environmental debates around sustainability, alternatives to economic development and gender power relations.

economic policies on states, markets, households, and communities. Relying on impressive empirical research, they argue that women bear the costs of and responsibility for care-giving and show that the theoretical framework provided by feminist analyses of social reproduction not only corrects the gender-blindness of most economic theories but suggests an alternative that places care-giving at its centre. In this illuminating study, they challenge feminist scholars to re-engage with materialism and political economy to engage with feminism.

This volume brings together the work of outstanding feminist scholars who reflect on the achievements of feminist political economy and the challenges it faces in the 21st century. The volume develops further some key areas of research in feminist political economy – understanding economies as gendered structures and economic crises as crises in social reproduction, as well as in finance and production; assessing economic policies through the lens of women’s rights; analysing global transformations in women’s work; making visible the unpaid economy in which care is provided for family and communities, and critiquing the ways in which policy makers are addressing (or failing to address) this unpaid economy.

This engaging new text uses a feminist lens to crack open the often hidden worlds of gender and work, addressing enduring questions about how structural inequalities are produced and why they persist. Making visible the social relationships that drive the global economy, the book explores how economic transformations not only change the way we work, but how we live our lives. The full extent of changing patterns of employment and the current financial crisis cannot be fully understood in the confines of narrow conceptions of work and economy. Feminists address this shortcoming by

developing both a theory and a political movement aimed at unveiling the power relations inherent in old and new forms of work. By providing an analysis of gender, work, and the economy, Heidi Gottfried brings to light the many faces of power from the bedroom to the boardroom. A discussion of globalization is threaded throughout the book to uncover the impact of increasing global interconnections, and vivid case studies are included, from industrialized countries such as the US and the global cities of New York, London, and Tokyo, as well as from developing countries and the emerging global cities of Beijing, Shanghai, and Dubai. This comprehensive analysis of gender and work in a global economy, incorporating sociology, geography, and political economy perspectives, will be a valued companion to students in gender studies and across the social sciences more generally.

This collection sets out how a gendered approach to political economy can help us understand the inherently gendered structures that characterise our society, and provide the foundation for a truly interdisciplinary social science. It provides a comprehensive coverage of gendered political economy - what it is, where it is and, perhaps more importantly, how it should develop. The twelve chapters that make up this volume combine the development of a theoretical framework with empirical examples, which illustrate the core concerns of gendered political economy.

University of Essex Shirin Rai pushes us to rethink development. She brings us to ear a feminist analysis that grows out of her nuanced understanding of both China's and India's gendered experience. --Cynthia Enloe, Clark University This important book ranges across contemporary debates in the study of gender and political economy. It situates differing gender-based theories in the context of wider political and historical processes such as colonialism, post-colonialism, Cold War politics, the New World Order, globalization and democratization. Shirin Rai focuses on the gendered nature of the political economy of development, and the shifts that have occurred as economies and states have moved from a development process that is state-focused to one that is clearly framed by globalization. Differences between men and women, and differences between women in contrasting social and geographical positions, are explored in relation to their influence on political practice. Rai considers how the structures of economic and political power frame men and women and examines the consequences of these gendered positionings. She makes important connections between the political narratives of different levels of governance and examines the discourse of empowerment at these different levels. The book concludes by reflecting on the way men and women are coping with the challenges of globalization and argues that women's movements need to re-establish the link between the recognition of difference and the redistribution of economic and social resources if they are to maintain their radical edge. This will be essential reading for undergraduates and graduates in politics, development studies and gender studies.

more than their male counterparts? How can elderly women empower themselves to change inadequate living conditions? Considering these and other questions, *Gender and Later Life* examines how gender and class influence the well-being of people in later life and considers if these factors are more relevant than chronological age. The authors use a political economy perspective to integrate research on aging and gender and to provide a better understanding of gender differences in later life. Essential reading for those with interests in women's studies, social gerontology, medical sociology, and social policy. "The use of the political economic framework provides an enlightening, provocative foundation for understanding the issues of gender and aging. The insights provided into the life span dynamics of later life dependency are convincingly presented. The realistic conclusion derived from reading this very important book is that we can do little to respond to the issues of gender and aging until we have resolved gender, class, and racial inequities occurring across the life span. However, until such resolution occurs, we must continue to seek ways to respond to the material, health, and caring resource limitations of aging women. . . . The conclusions of the book provide important insights that need to be understood by professionals and lay people of all backgrounds. Although academic in nature, the insights presented have value for all those concerned about quality of life for women across the life span. The book is highly recommended for use in graduate courses related to public policy, gender, or aging studies." --*Journal of Women and Aging* "This is a complex but concise and well-organized book, an important contribution to the development of productive links between sociology and gerontology." --*Sociology* "This book has, with facts and figures, shaken me up and opened my eyes so I could see the connections in the jigsaw of oppression. Highly readable, clear and challenging. I recommend it as essential reading for all those in the struggle for equality of opportunity for all." --*Radical Statistics Newsletter* "The book has many virtues. . . . I hope that [*Gender and Later Life*] will be widely read by

those who are already involved in social and health services, as well as by those who are on the threshold of their working lives and want to contribute in their careers to measures designed to produce greater social equity." --Journal of the British Society of Gerontology "Arber and Ginn have produced an extremely valuable contribution to the literature on social gerontology. They have outlined a powerful new synthesis, a feminist political economy perspective on old age that will advance our understanding of life for a significant section of our population." --Journal of Biosocial Science

The Routledge Handbook of Feminist Economics presents a comprehensive overview of the contributions of feminist economics to the discipline of economics and beyond. Each chapter situates the topic within the history of the field, reflects upon current debates, and looks forward to identify cutting-edge research. Consistent with feminist economics' goal of strong objectivity, this Handbook compiles contributions from different traditions in feminist economics (including but not limited to Marxian political economy, institutionalist economics, ecological economics and neoclassical economics) and from different disciplines (such as economics, philosophy and political science). The Handbook delineates the social provisioning methodology and highlights its insights for the development of feminist economics. The contributors are a diverse mix of established and rising scholars of feminist economics from around the globe who skilfully frame the current state and future direction of feminist economic scholarship. This carefully crafted volume will be an essential resource for researchers and instructors of feminist economics.
