Hurricane Motion - Metric Gizmo - ExploreLearning
These giant storms, which form in tropical areas, have an unusual structure. As you approach the center of a hurricane, wind speed increases until you pass through the eye wall (where wind speeds are maximum) and into the eye. Then, the winds calm and the sun shines for a brief time—until the next eye wall arrives. With the Hurricane Motion Gizmo, students view the structure of a hurricane and observe the weather conditions that occur as a hurricane moves over a weather station.

Teachable Moment: Hurricane Motion, by Heather Jones September 3, 2014. Despite a mild hurricane season, we are at the peak of activity for 2014. Tropical Storm Dolly recently made landfall in Mexico, and Tropical Storm Norbert is looming off California Baja. In addition, storms are still brewing off the coast of Africa. Using the Hurricane Motion Gizmo, students can observe the characteristics of a hurricane and practice predicting its location and path.
